

Learnings from previous sessions

- ⇒ **Prefix Sum** → Range Queries [eg. sum from index s to e]
- ⇒ **Carry Forward Technique** → using previously calculated result
- ⇒ **Subarrays** → contiguous part of an array
 - * **Sliding Window** → answer w.r.t to the given window size
 - * Contribution by an $A[i]$ to the answer
→ sum of all subarray sums.
- ⇒ **2D arrays**

Ques 1. Given an integer matrix $[N][N]$, print all

boundaries in clockwise direction

Q2. Max consecutive 1s in an array. Amazon

Given a 1D array containing just 1s & 0s.

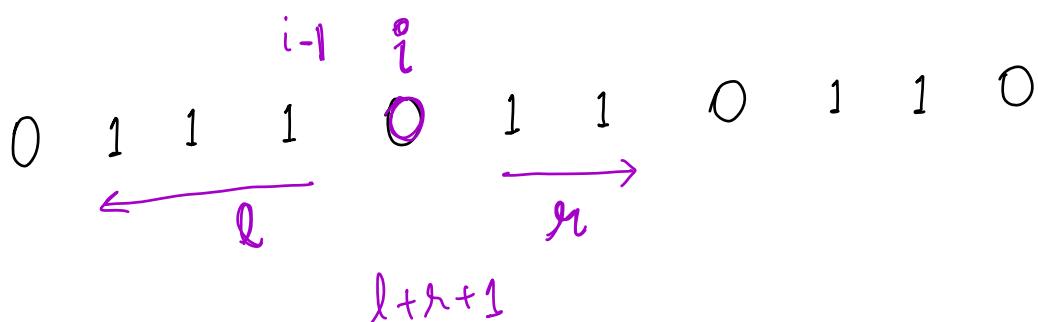

Find the length of max consecutive 1s.

* You can replace almost one 0 with 1.

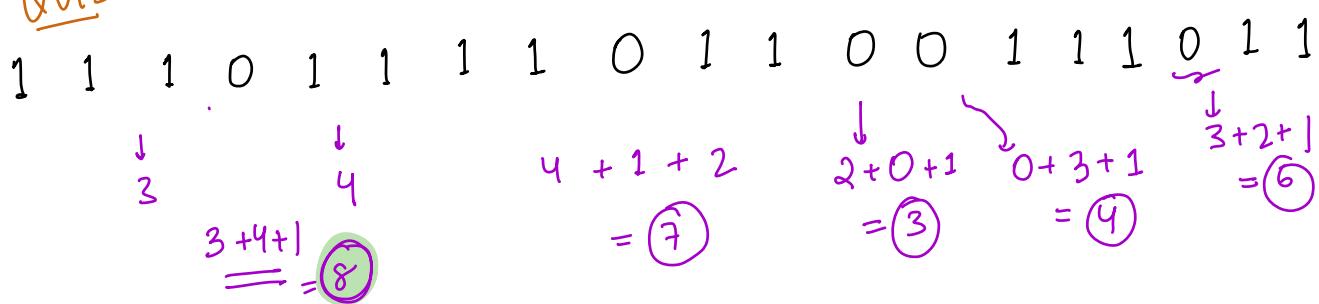

$$\text{Ans} \rightarrow \underline{\underline{6}}$$

- QUIZ -

QUIZ

```
bool flag = false
```

```
ans = 0
```

```
for(i=0; i<N; i++) {
```

```
    if (A[i] == 0) {
```

```
        flag = true
```

```
        // l = consecutive count of 1s on left
```

```
        l = 0
```

```
        for(j=i-1; j>=0; j--) {
```

```
            if (A[j] == 1) l++
```

```
            else break
```

```
}
```

```
// r = consecutive count of 1s on right
```

```
r = 0.
```

```
for(j=i+1; j<N; j++) {
```

```
    if (A[j] == 1) r++
```

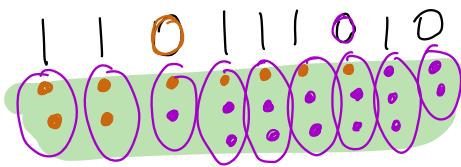

```
    else break
```

```
}
```

```
ans = max(ans, l+r+1)
```

```
}
```

```
}  
if (flag == false) return N  
return ans
```

```
→ if (l+r+1 > ans) {  
    |  
    ans = l+r+1  
}
```

What if all 1s are present?

1 1 1 1 1
{ } → N

DRY RUN

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| 1 | 0 | 1 | 1 | 0 | 1 | 0 | 1 |
| . | . | . | . | . | . | . | . |
| . | . | : | : | : | : | : | . |
| | | . | . | . | . | . | . |

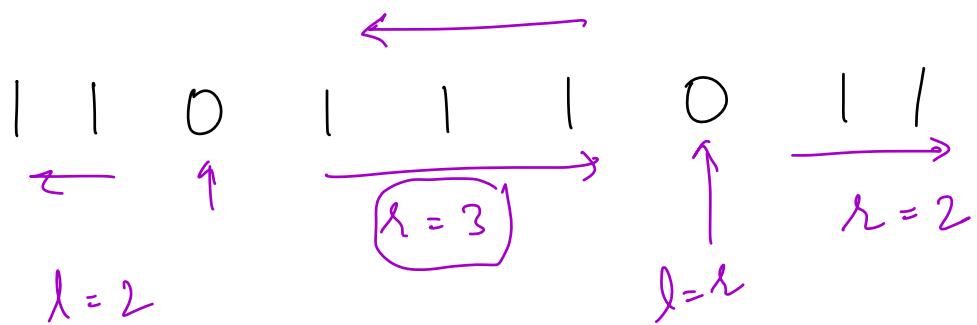

We are visiting each element at max thrice.

Iteration: $\underline{3 \times N}$ [at max]

TC $\rightarrow O(N)$

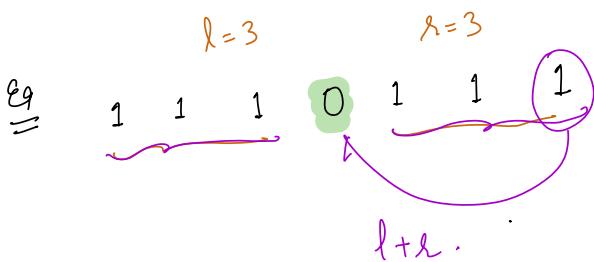

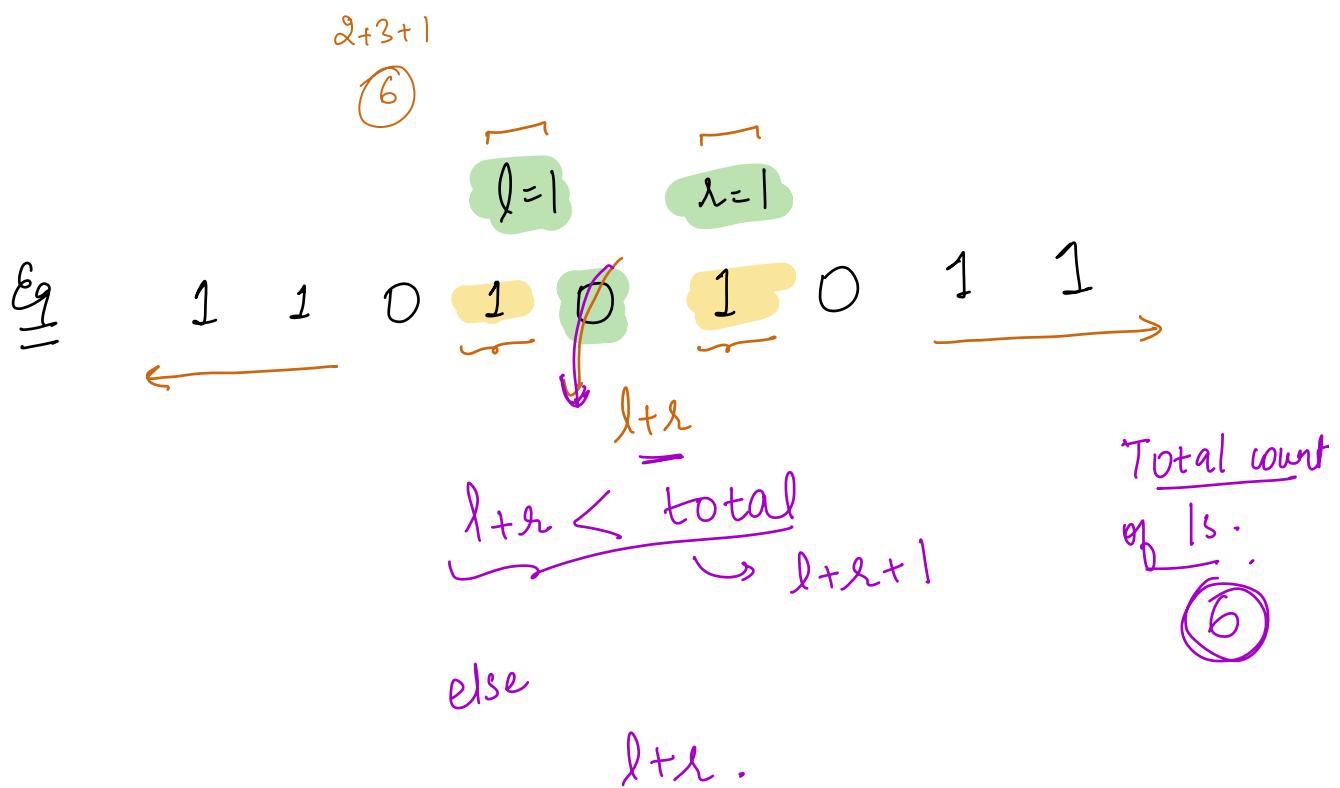

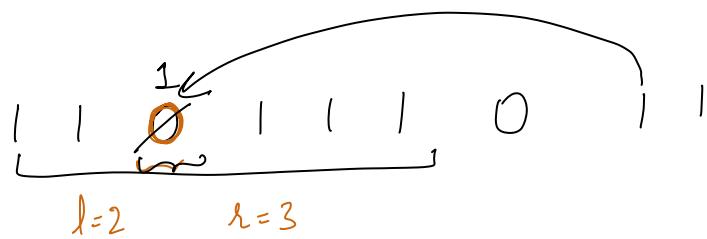

(HW)

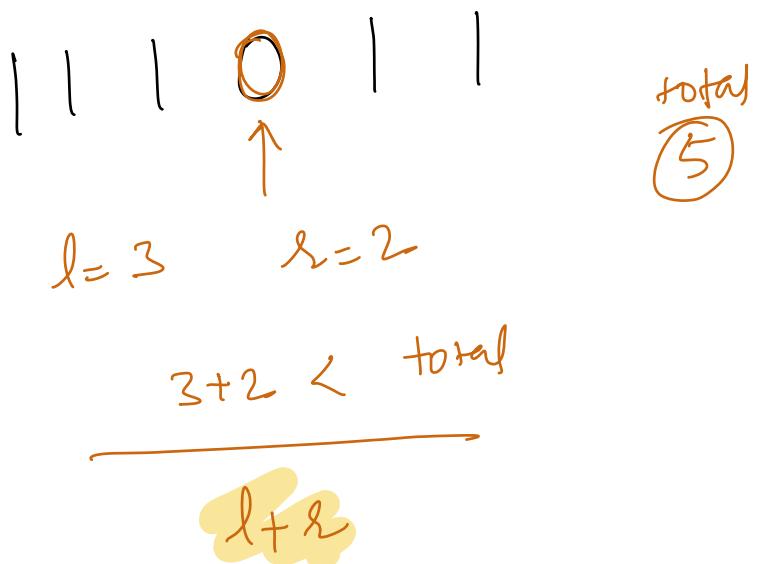

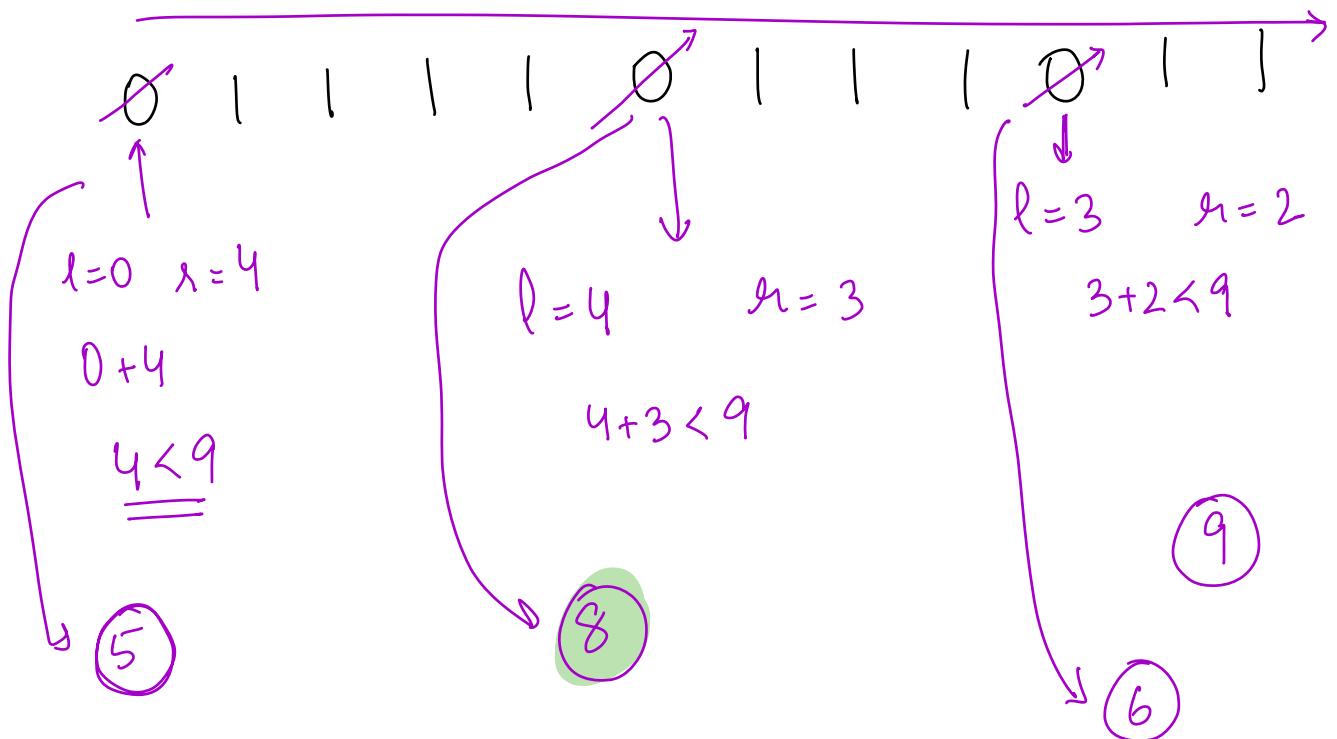

Approach with less iterations but with same TC.

Modified version of Max Consecutive 1's.

Swap atmost one 0 with 1 present in array itself.

① get one count of 1s \Rightarrow count_1s

bool flag = false

ans = 0

for($i=0$; $i < N$; $i++$) {

 if ($A[i] == 0$) {

 flag = true

 // l = consecutive count of 1s on left

 l = 0

 for($j=i-1$; $j \geq 0$; $j--$) {

 if ($A[j] == 1$) l++

 else break

 // r = consecutive count of 1s on right

 r = 0.

 for($j=i+1$; $j < N$; $j++$) {

 if ($A[j] == 1$) r++

 else break

 }

 len = l + r

 if ($len < \text{count_1s}$) len++

 ans = max(ans, len)

 }

}

 if (flag == false) return N

 return ans

Q: Triplets

Goldman Sachs

Given an array

Count no. of triplets

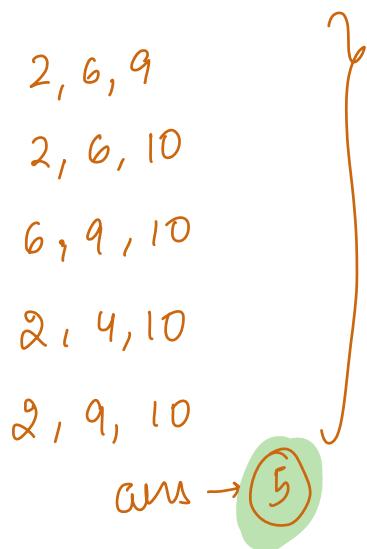

$$A[i] < A[j] < A[k]$$
$$i < j < k$$
